

1964 aerial photograph with close-up of properties in Block A along Morse Street and wooded slopes to their north showing former topography and fill areas now covered by subsequent filling up to study area boundary line. Annotations are features visible with a stereoscope. Solid arrows point down-slope, dashed arrows are aligned with swales. Light blue outlines are fill areas visible within depressions that are now within the school athletic fields (Public Properties Study Area). Green outline is the continuation of these fill areas within backyards of these homes (Non-Public Properties Study Area) as mapped by the Initial and Supplemental investigations. Magenta and blue lines are 4 and 10-foot thick fill contour lines.
