RE: Final Dust Control & Air Monitoring Plan
Hamden Non-Public Properties
Newhall Street Neighborhood Site (SRD-128)

Dear Mr. Share:

The Remediation Division of the Bureau of Water Protection and Land Reuse (the Department) has reviewed the plan from Olin Corporation dated August 2009, titled "Final Dust Control & Air Monitoring Plan, Non-Public Properties, Newhall Street Neighborhood Site", and the accompanying letter report dated August 19, 2009, titled "Response to CTDEP Comments Dated July 20, 2009 and CT DPH Comments Dated July 30, 2009". The plan was prepared by Severson Environmental Services and the letter report was prepared by MACTEC on behalf of Olin Corporation and in conjunction with Consent Order SRD-128, and the Department's October 6, 2008 Conditional Approval of the Generic Remedial Action Plan.

The plan identifies the potential sources of fugitive dust that may occur during the excavation of waste fill from non-public properties in the Newhall Street Neighborhood site, and the best management practices that will be implemented to prevent conditions conducive to dust generation. In the event particulate air monitoring and/or visual observations indicate unacceptable fugitive dust is being generated from the excavation activities, the plan identifies corrective measures that will be implemented to address the condition.

The letter report provides responses to comments and questions presented by the Department, and the Department of Public Health, on Olin's ten draft plans for implementing the approved remedial action plan.

The above referenced Final Dust Control & Air Monitoring Plan and letter report are hereby approved.

Approval

Final Dust Control & Air Monitoring Plan

Hamden Non-Public Properties, Newhall Street Neighborhood Site (SRD-128)

Nothing in this approval shall affect the Commissioner's authority to institute any proceeding, or take any action to prevent or abate pollution, to recover costs and natural resource damages, and to impose penalties for violations of law. If at any time the Commissioner determines that the approved actions have not fully characterized the extent and degree of pollution or have not successfully abated or prevented pollution, the Commissioner may institute any proceeding, or take any action to require further investigation or further action to prevent or abate pollution. This approval relates only to pollution or contamination identified in the above referenced plan.

In addition, nothing in this conditional approval shall relieve any person of his or her obligations under applicable federal, state and local law.

If you have any questions pertaining to this approval, please contact Raymond Frigon, Jr. of my staff at (860) 424-3797.

Sincerely,

Patrick F. Bowe

Director

Remediation Division

Bureau of Water Protection and Land Reuse
